

## Positioning Challenge

Upload the challenge-position.html and sale.png files to Cloud9

Edit the challenge-position.html file so that:

1. Separate the CSS into an external stylesheet
2. Link the external stylesheet into the head
3. Use absolute positioning to make the sale.png image sit permanently at the top right of the page.
4. Add a fixed footer.
5. Put a link in the footer called "Back to top" which scrolls back to the top of the page.
6. Add two equally-spaced columns of placeholder text and check that it scrolls under the footer.
7. Upload your code to the W3C validator to make sure it works.
8. Add and commit this to GitHub
